Please pass this on to the Local Government Committee the following:

I support HB 4795 to ensure that local units of government are held accountable for deliberate and willful violations of the State laws that you have passed. It is important that we hold the individual persons, not the community, accountable for these deliberate illegal actions. All other laws which are targeted at citizens hold personal fines to ensure compliance, so it is only logical and fair that laws that you have enacted to limit local government officials should also be enforced through personal accountable fines.
